PROFESSIONAL PROFILE

Junior software developer with experience building full-stack, cloud, and AI-powered applications using modern web technologies. Skilled in React, Next.js, Azure, Power Platform, and database-driven systems, with a solid foundation in testing, security, and SDLC practices. Collaborative, quick to learn, and effective at turning requirements into reliable, production-ready software solutions.

TECHNICAL SKILLS

- **Languages:** Python, C#, Java, JavaScript, TypeScript, SQL, HTML/CSS
- **Web & Application Development:** React, Next.js, Node.js, Expo, REST APIs
- **Cloud & Platforms:** Microsoft Power Platform, Azure, Firebase, Vercel, Expo EAS
- **Tools & Technologies:** Git/GitHub, Firestore, Docker, CI/CD, OAuth2
- **Core Competencies:** Full-Stack Development, Cloud Architecture, Software Testing & QA, Application Security, SDLC, Agile Methods

PROFESSIONAL EXPERIENCE

Summer Student – IS&T Apps

May 2025 – Aug 2025

Kingston Midstream, Calgary, AB

Team Lead: Simon Ngan – simon.ngan@kingstonmidstream.com

- Worked alongside senior developers and business analysts, gaining hands-on experience with professional development practices and enterprise systems.
- Contributed to requirements gathering, design discussions, and structured testing activities across the SDLC.
- Supported and helped coordinate User Acceptance Testing (UAT), preparing scenarios, assisting users, and validating feedback.
- Worked extensively with Microsoft Power Platform, Dataverse, SharePoint, and SQL Server data via SQL Server Management Studio (SSMS).
- Gained experience working within Dev > Test > Prod pipelines, version-controlled solutions, and Power Platform environments.
- Helped deliver a production-ready internal application, providing value to the IS&T team and improving workflow efficiency.

EDUCATION

Software Development (Graduating Dec. 2025)

Southern Alberta Institute of Technology (SAIT), Calgary, AB

- **Coursework:** Object-Oriented Programming, Database Programming, Web Development, Software Testing, Software Security, Cloud Computing (Azure), Capstone Project, UI/UX
- **Skills:** Full-Stack Development, Database Design, Cloud Architecture (Azure), Software Testing & QA, Application Security, SDLC, Agile Methods
- **GPA:** 3.7
- **Capstone Project:** *Tutti - AI powered royalty-free music search*

PROJECT EXPERIENCE

IT Change Request App

Microsoft Power Platform - Power Apps, Power Automate, Dataverse

- Designed and built a Power Apps Model-Driven App to modernize the company's IT Change Request process.
- Integrated Microsoft Dataverse, SharePoint, and legacy IT systems for unified and secure data management.
- Worked closely with IT stakeholders to gather requirements, build prototypes, conduct UAT, and deliver a production-ready solution.
- Deployed to production through a structured Dev > Test > Prod pipeline.

Tutti – AI powered royalty-free music search

React, Next.js, Node.js | <https://ai-music-search.vercel.app/>

- Developed an AI-driven music search app using OpenAI GPT-4o to convert user prompts into searches against a royalty-free music database
- Built interactive features including music search, streaming, downloading, user profiles, and playlist management.
- Implemented OAuth2 + Firebase Authentication for secure user logins and persistent user profiles.
- Designed a Firestore database for storing profiles, playlists, and session data.
- Implemented serverless APIs using Next.js API routes for AI orchestration and API integration.
- Deployed on Vercel with automated GitHub Actions CI/CD, enabling continuous deployment and version-controlled builds.

Student Information System Database (SQL)

- Designed and implemented a mock student information system to practice SQL, relational modeling, and database normalization.
- Developed complex queries for reporting, filtering, and relational data retrieval.
